Track Wise: Relational Expense Analytics Platform

SDG: 8 – Decent Work and Economic Growth

Presented By:

DABBAKUTI ANUSHA – VTU26642 – 23UECS0137

Courses Handling Faculty:

Dr. Hafizur Rahman, Assistant Professor

INTRODUCTION

1

❑ **Track Wise – Expense Tracker** is a web-based application developed using Spring Boot and Maven.

The system allows users to:

- Securely login
- Add expenses
- Edit and delete expenses
- View budget summary
- Generate monthly financial report
- Download report as PDF

The system automatically calculates:

- Total Expenses
- Remaining Balance
- Financial Health Status
- It helps users manage salary and spending efficiently.

PROBLEM STATEMENT

1

Traditional expense tracking methods are inefficient and error-prone, lacking real-time visibility and proper organization. Therefore, a secure and automated system is required to manage expenses accurately, monitor budgets instantly, and generate structured reports with PDF export.

2

❑ **Managing personal expenses manually leads to:**

- Calculation errors
- Poor tracking
- No real-time balance visibility
- No centralized storage
- No structured reporting

❑ **So there is a need for:**

- A secure login-based system
- Automated expense calculation
- Real-time budget monitoring
- Structured database storage
- Report generation with PDF export

OBJECTIVE(S)

1

2

3

4

5

6

7

8

9

- To build a secure login system using Spring Security
- To develop CRUD operations (Add, Edit, Delete expenses)
- To implement real-time budget calculation
- To store expense data in a relational database
- To generate a monthly expense report
- To allow PDF report download

PROPOSED SYSTEM

1 ☐ **The proposed system is a Spring Boot based web application.**

2 **Features:**

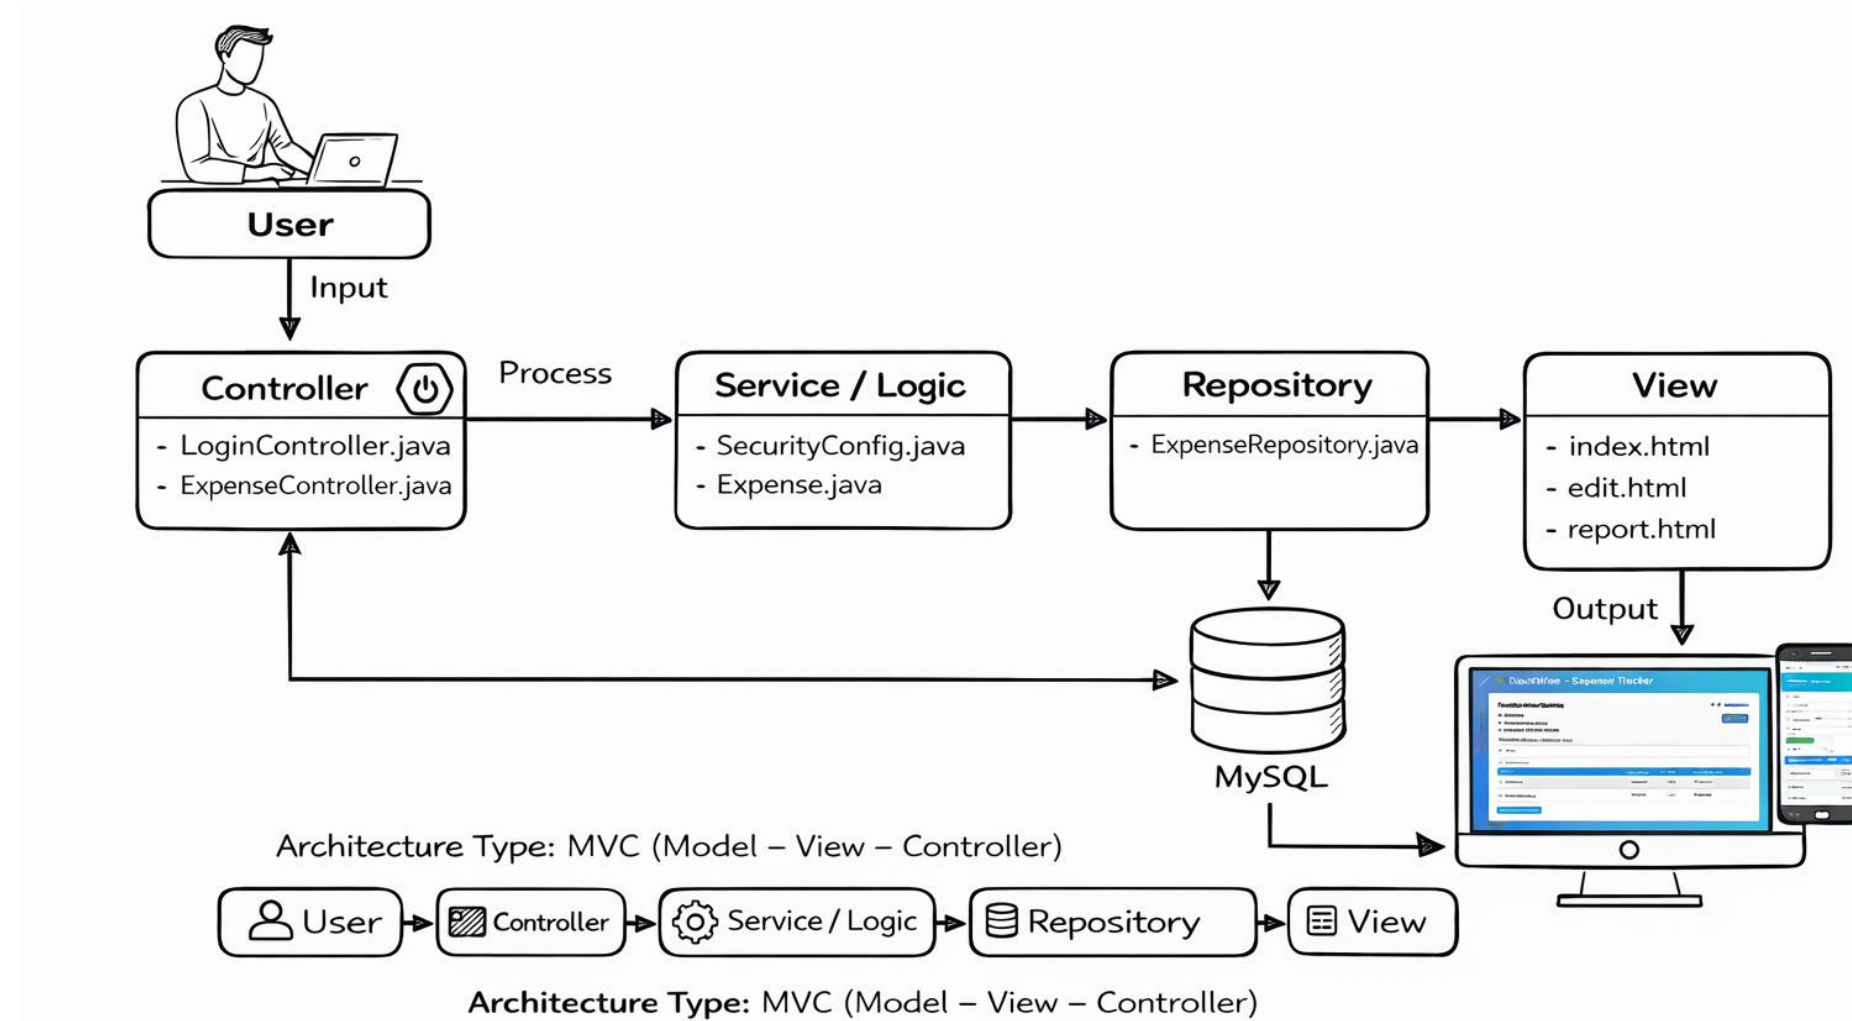

- User authentication
- Budget summary dashboard
- Add Expense
- Edit Expense
- Delete Expense with confirmation
- Expense exceeded warning
- Monthly report generation
- PDF download

7 **The system automatically:**

- Calculates total expenses
- Displays remaining balance
- Shows financial health message

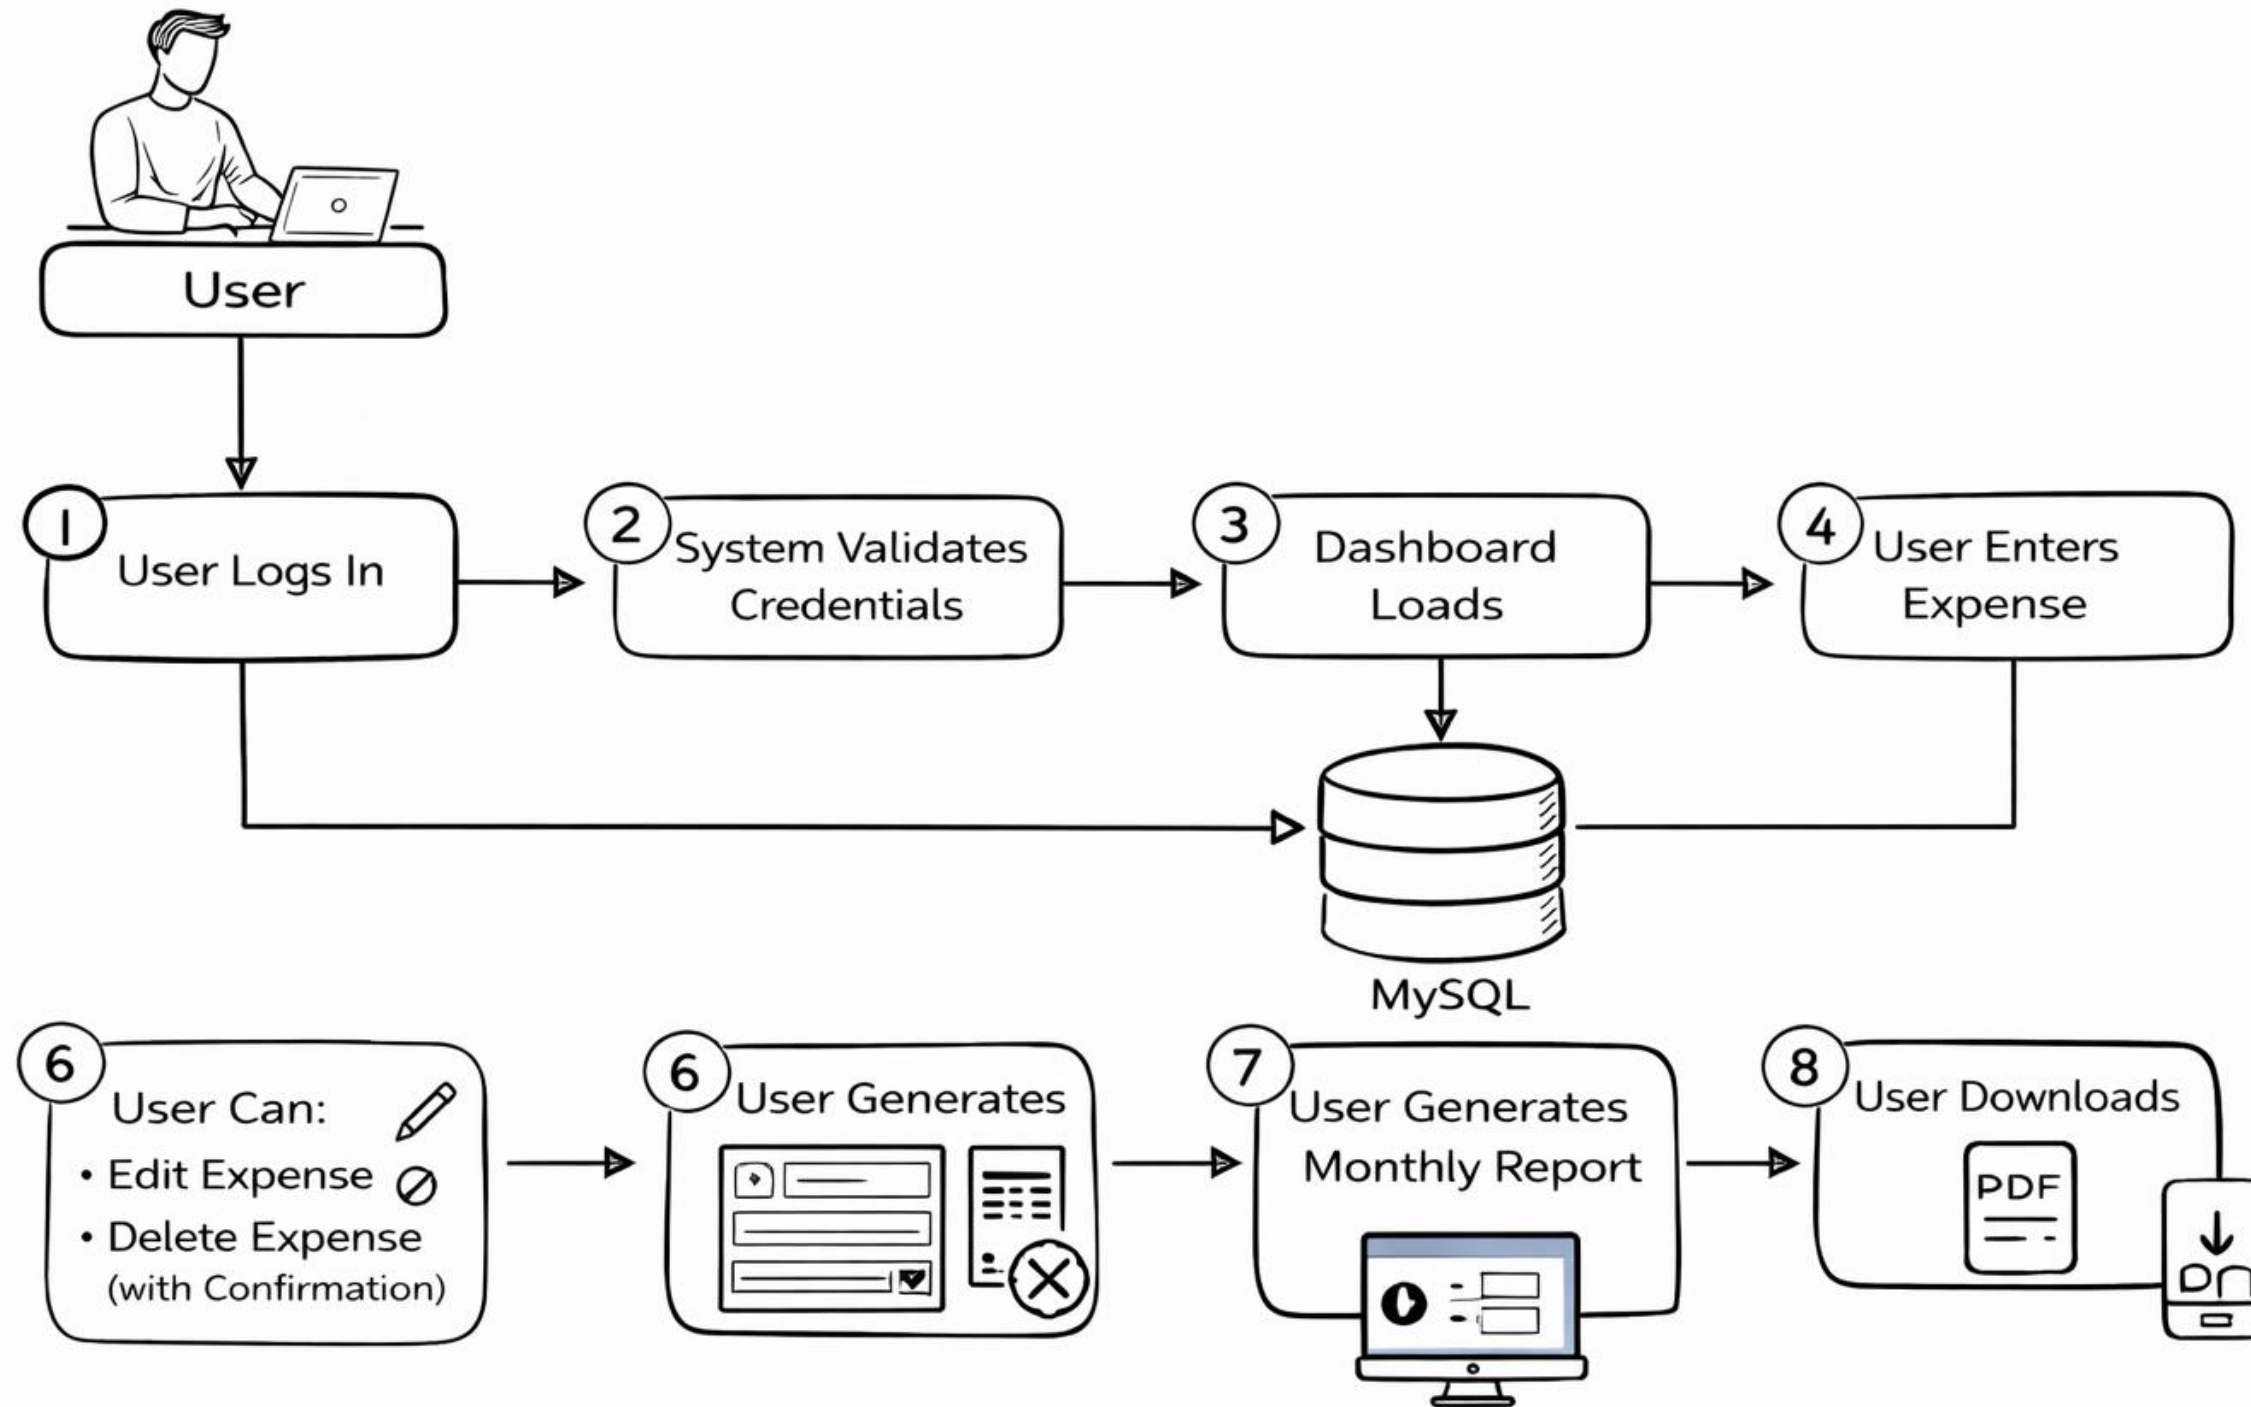

9

PROPOSED SYSTEM ARCHITECTURE

- **Input:** User enters expense and salary details through the web interface.
- **Processing:** The system validates data and calculates total expenses and remaining balance.
- **Database:** All expense records are stored and managed in a MySQL relational database.
- **Output:** The generated report will be downloaded.

WORKFLOW

TECHNOLOGIES USED

1

❑ Frontend:

- HTML
- CSS

2

❑ Backend:

- Java
- Spring Boot
- Spring MVC
- Spring Security

3

4

5

❑ Database:

- MySQL

6

7

❑ Tools:

- Eclipse IDE
- Maven
- Chrome Browser

8

9

MODULE DESCRIPTION

❑ Module 1 – User Authentication

- Login page
- Username & password validation
- Spring Security implementation

❑ Module 2 – Expense Management

- Add Expense
- Edit Expense
- Delete Expense (confirmation popup)

❑ Module 3 – Budget Summary

a) Displays:

- Salary
- Total Expense
- Remaining Balance

b) Shows:

- "Great! You saved ₹..."
- "Expenses Exceeded Salary!"

❑ Module 4 – Report Generation

- Displays monthly report
- Shows financial health
- Allows PDF download

IMPLEMENTATION SCREENSHOTS

1

2

3

4

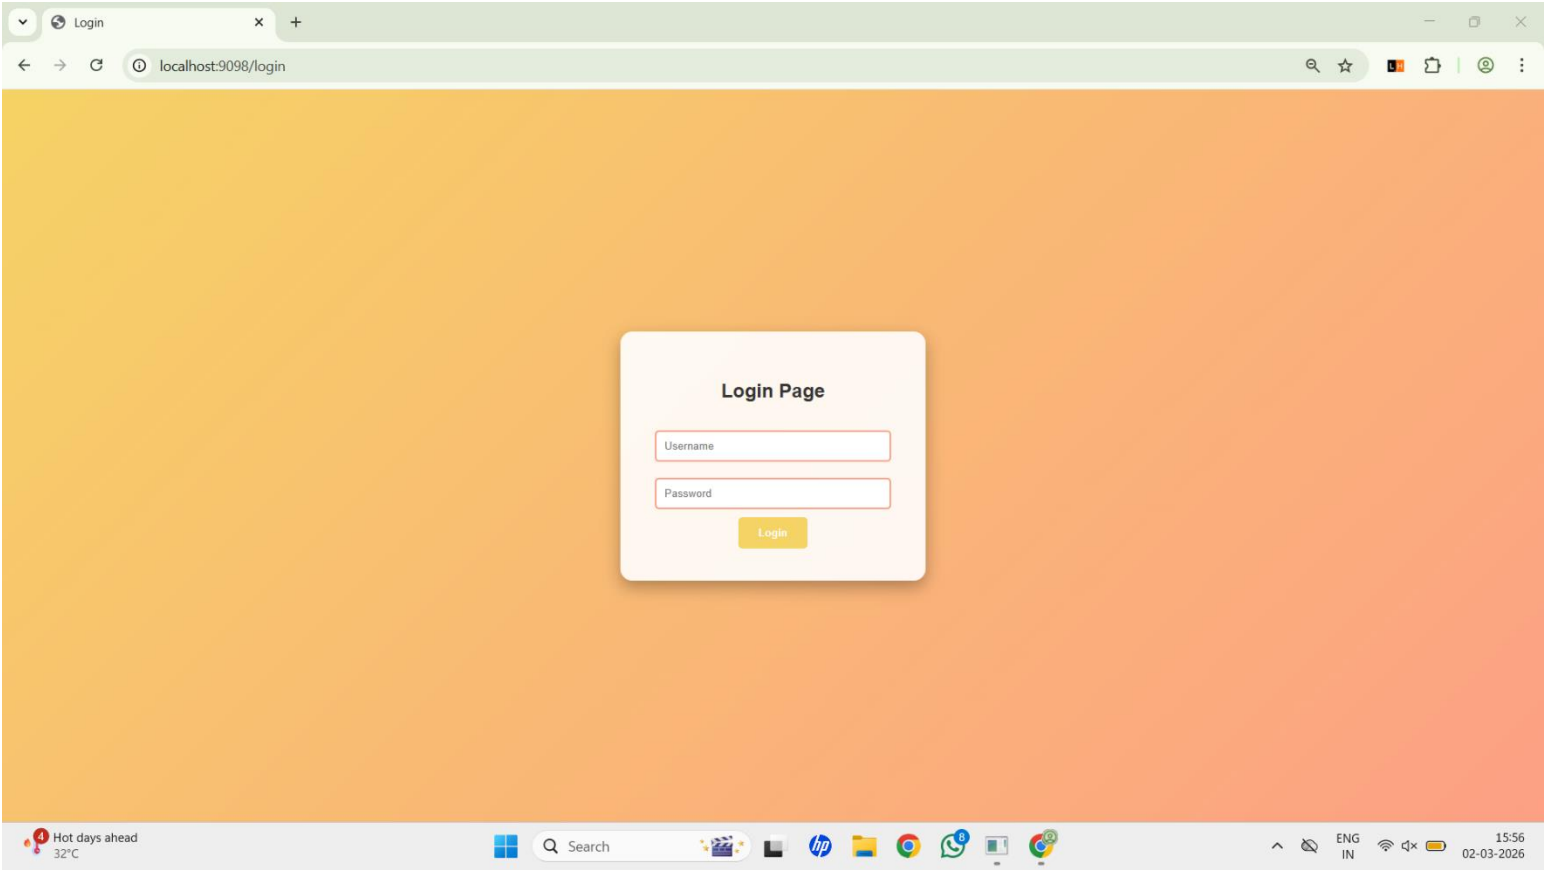

5

6

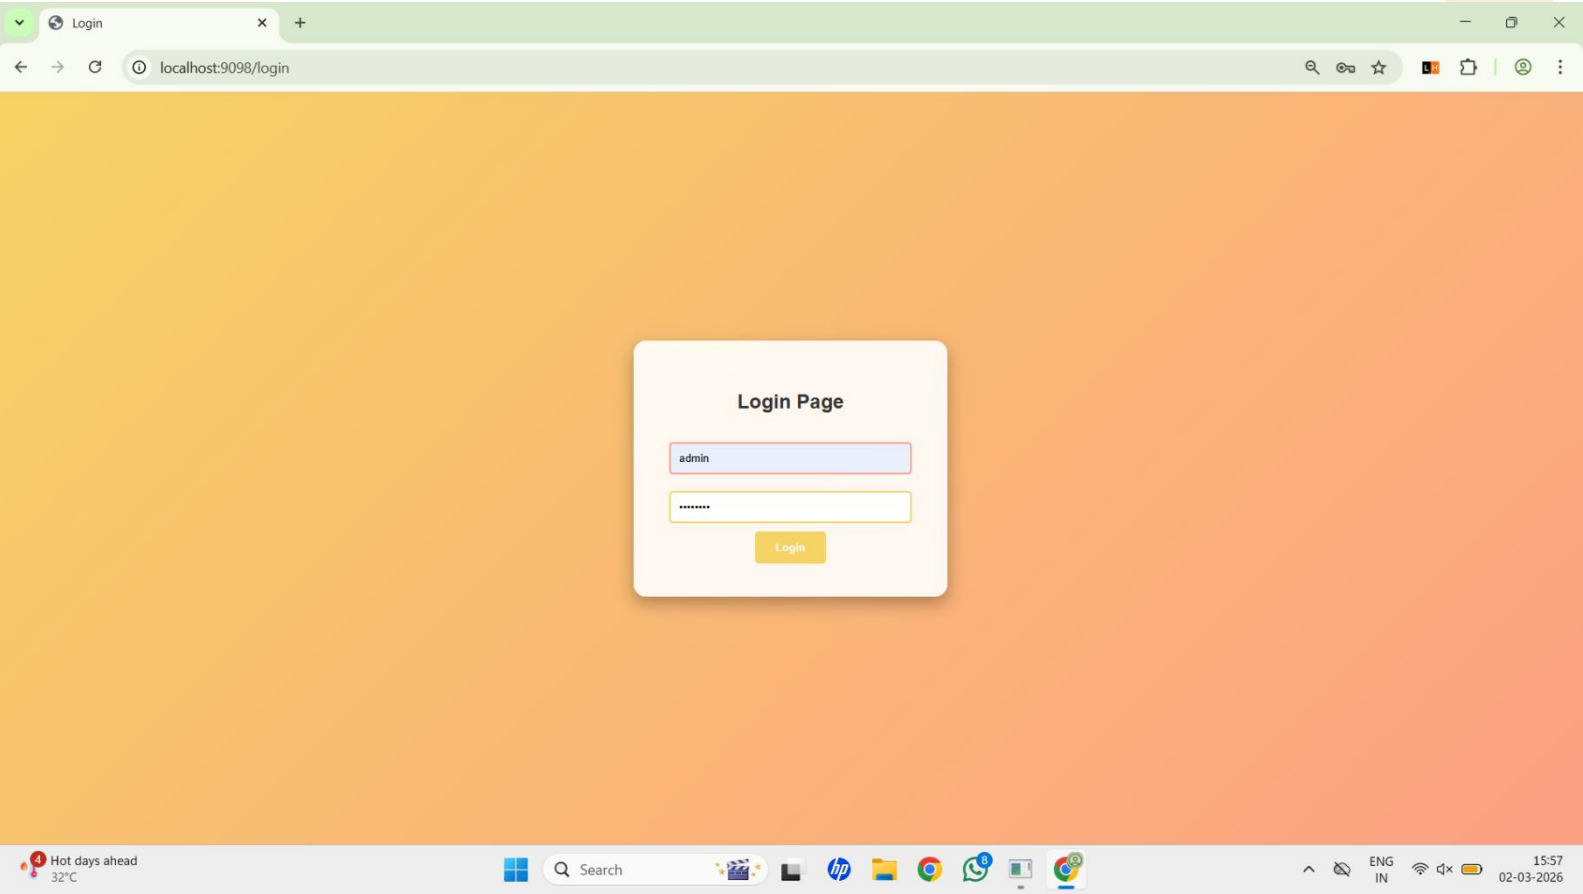

7

8

9

Login Page: Secure Login Page implemented using Spring Security for user authentication.

IMPLEMENTATION SCREENSHOTS

1

2

3

4

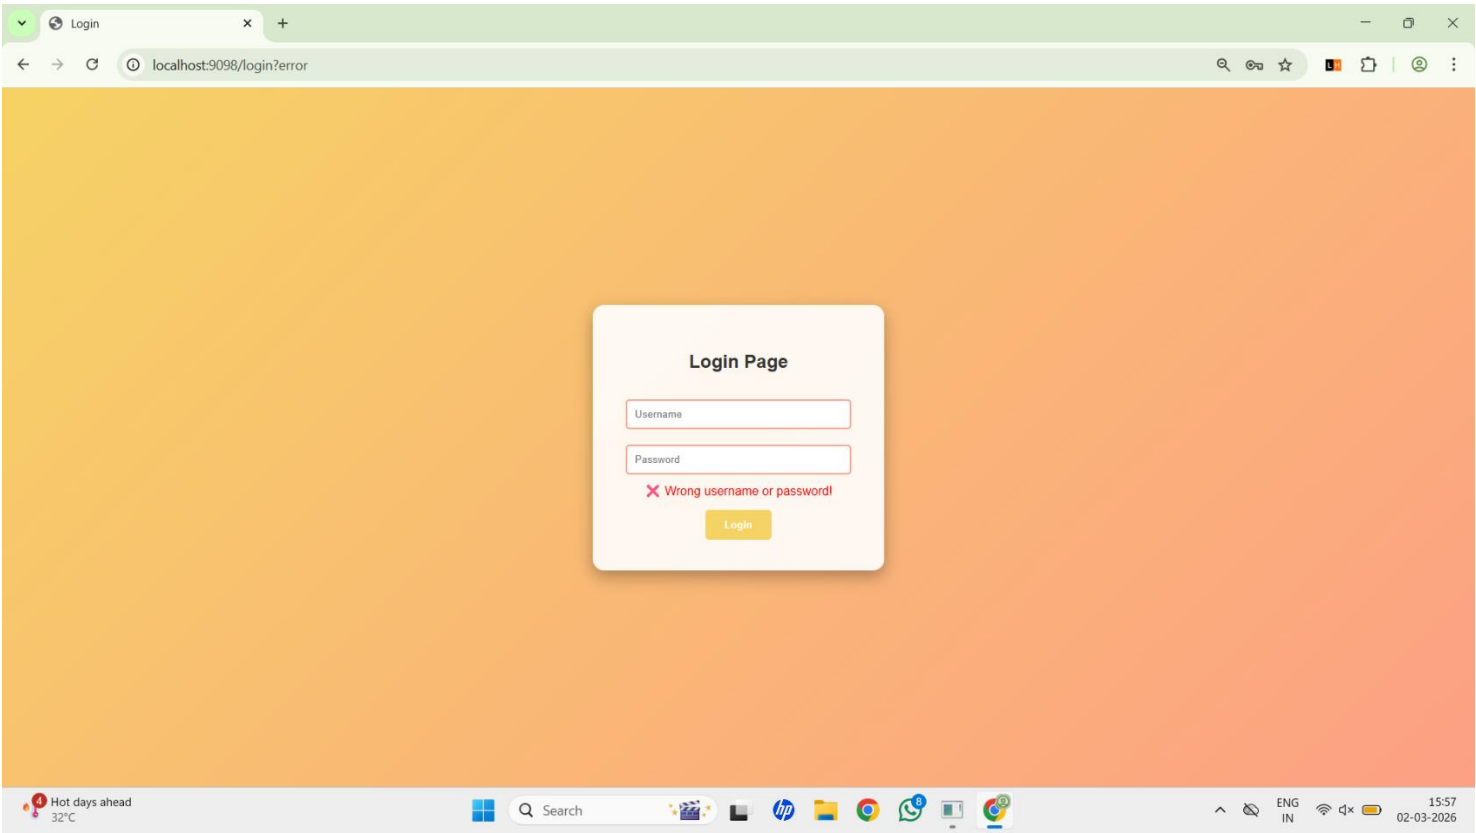

5

6

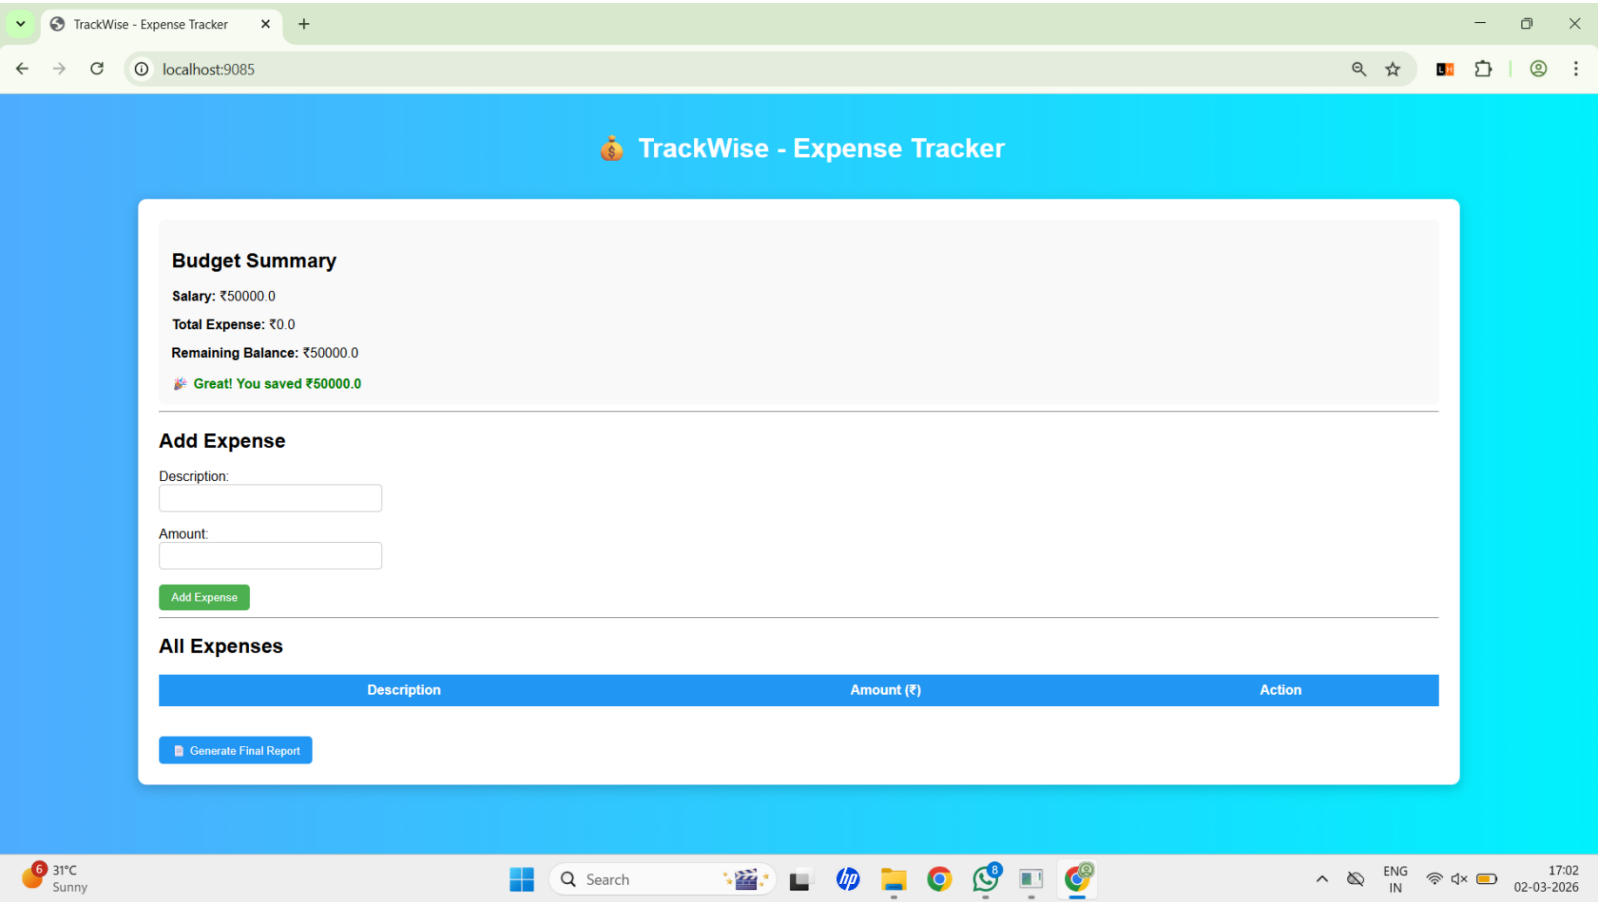

7

8(A)

9

Login Error Page: Login Error Message displayed for invalid username or password credentials.

Dashboard (Home Page): Dashboard displaying Budget Summary including Salary, Total Expenses, and Remaining Balance.

IMPLEMENTATION SCREENSHOTS

1

2

3

4

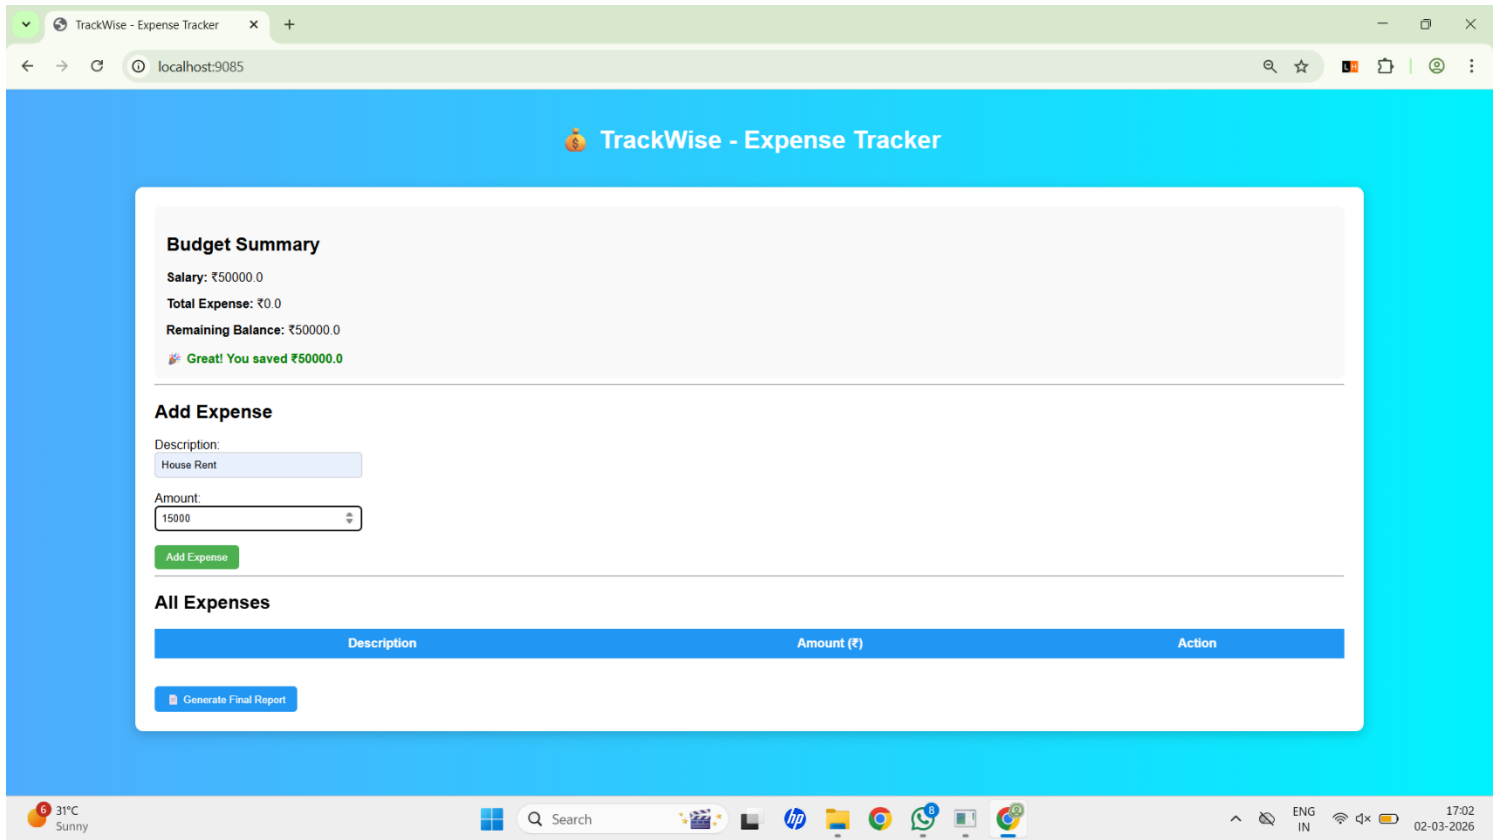

5

6

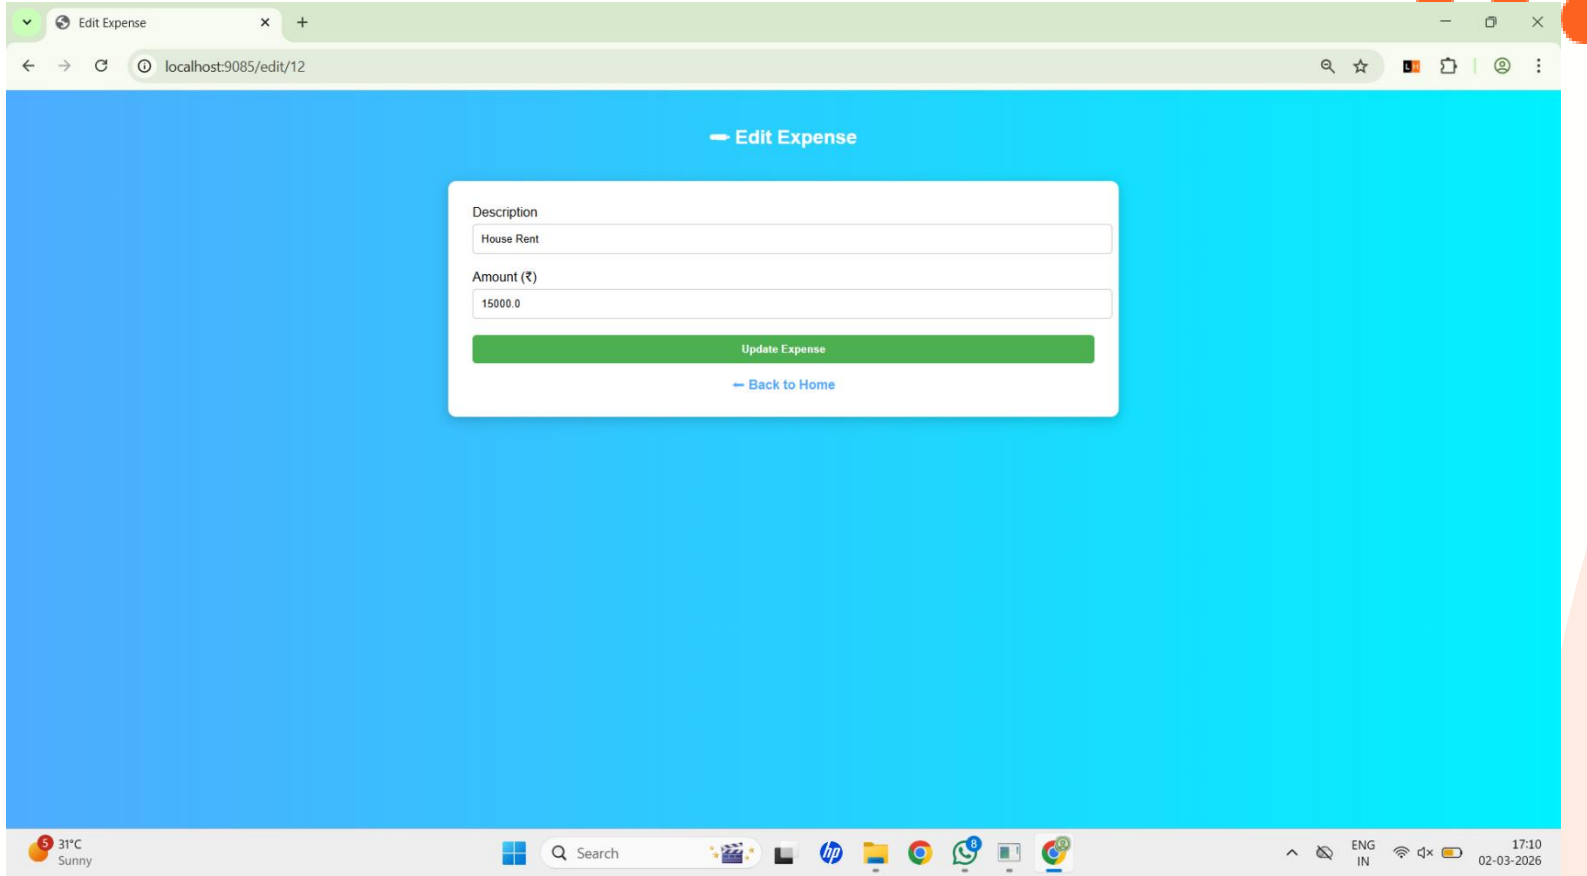

7

8(B)

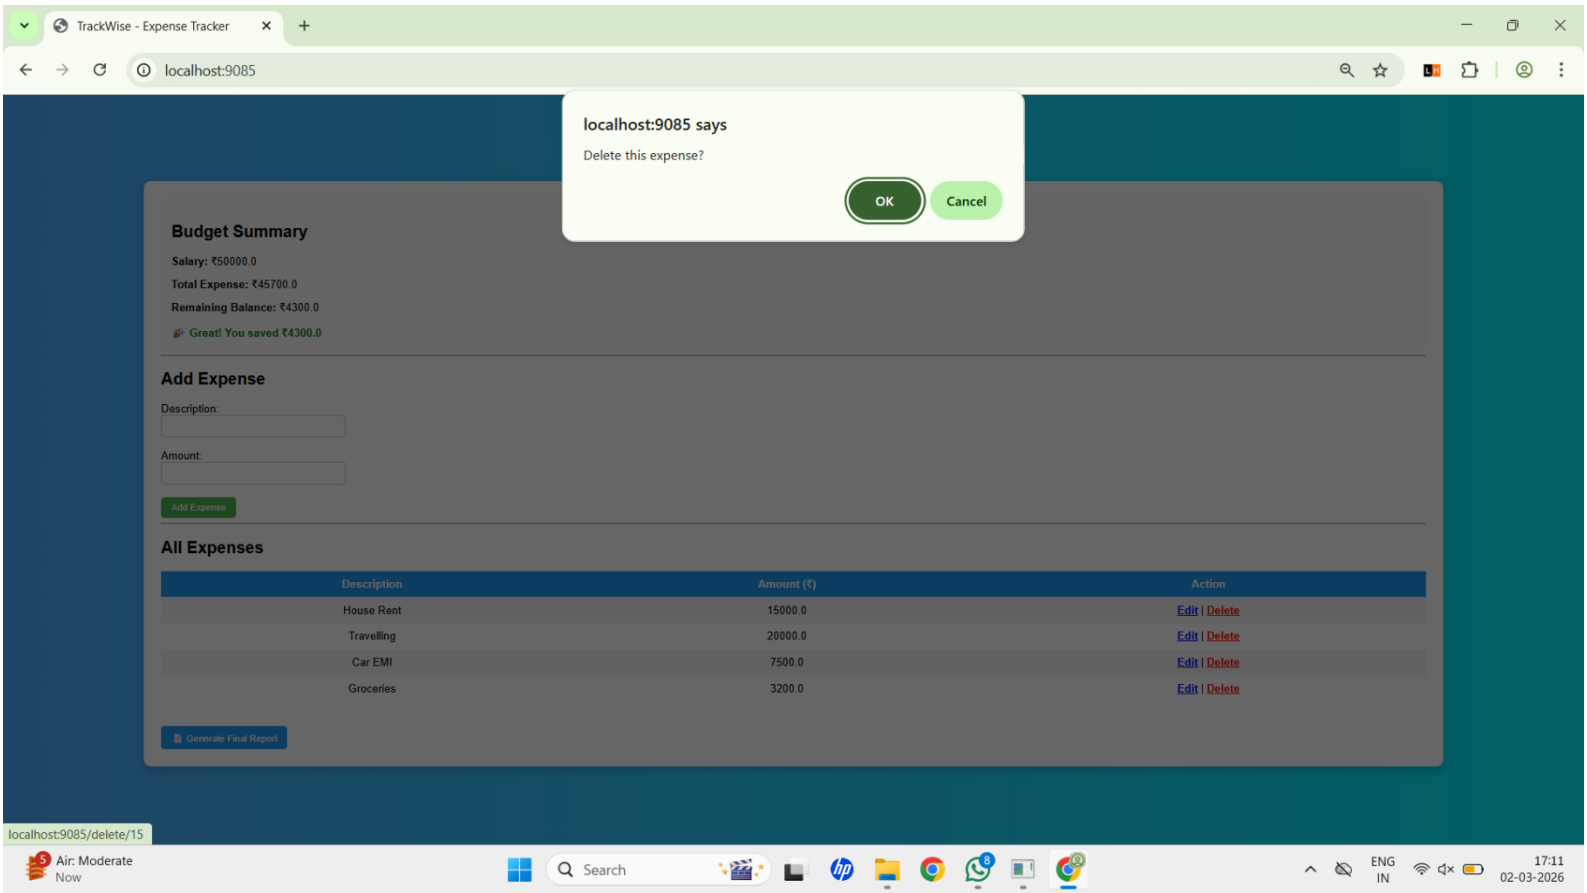

9

Add Expense: Add Expense Module allowing users to enter description and amount for new transactions.

Edit Expense: Edit Expense Page enabling modification of existing expense records.

Delete Confirmation: Delete Confirmation Popup ensuring secure removal of selected expense records.

IMPLEMENTATION SCREENSHOTS

1

2

3

4

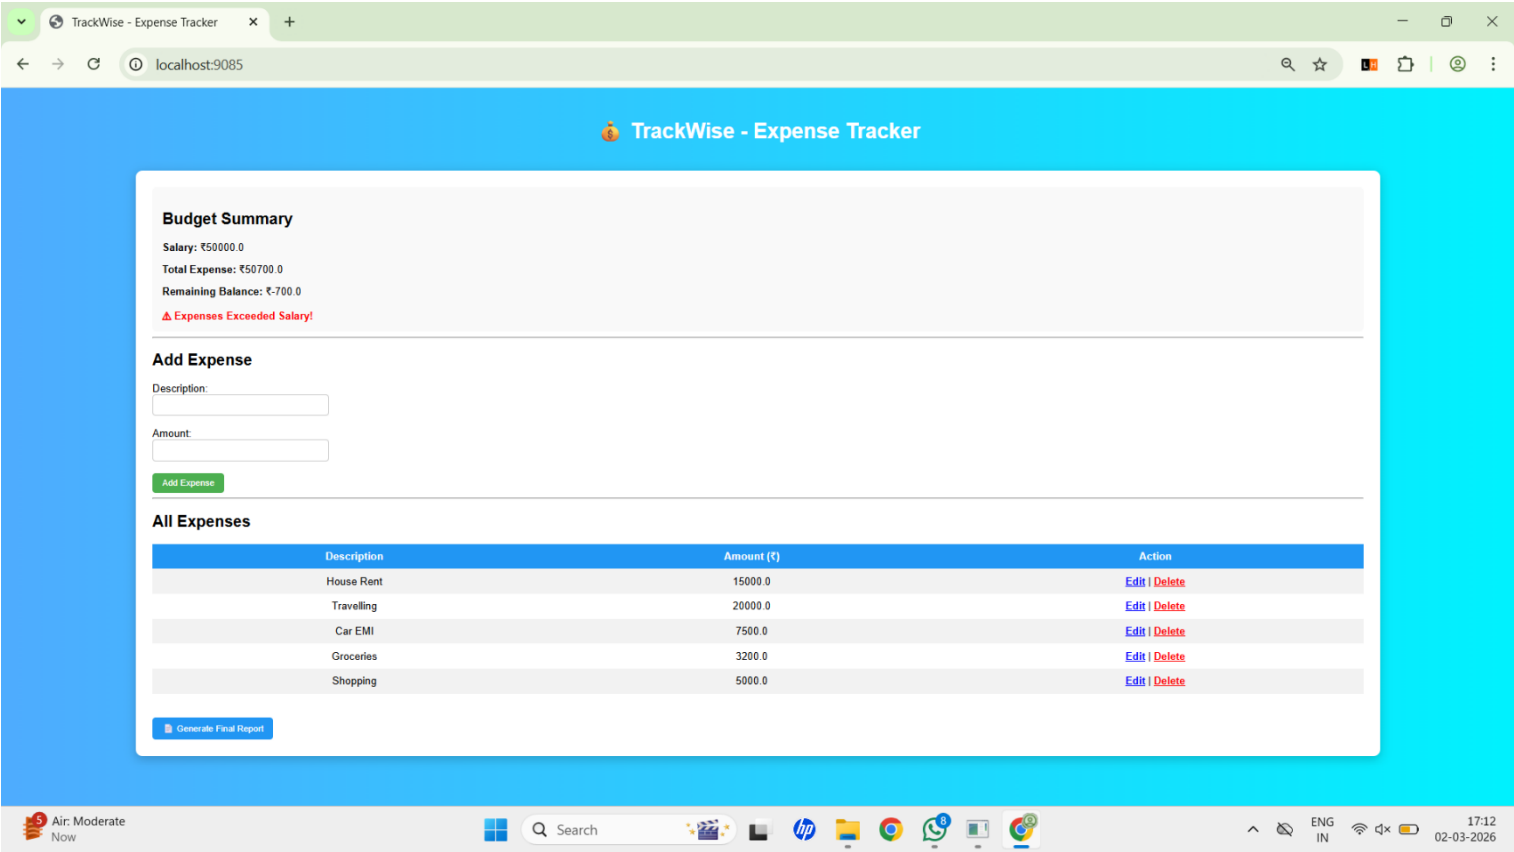

5

6

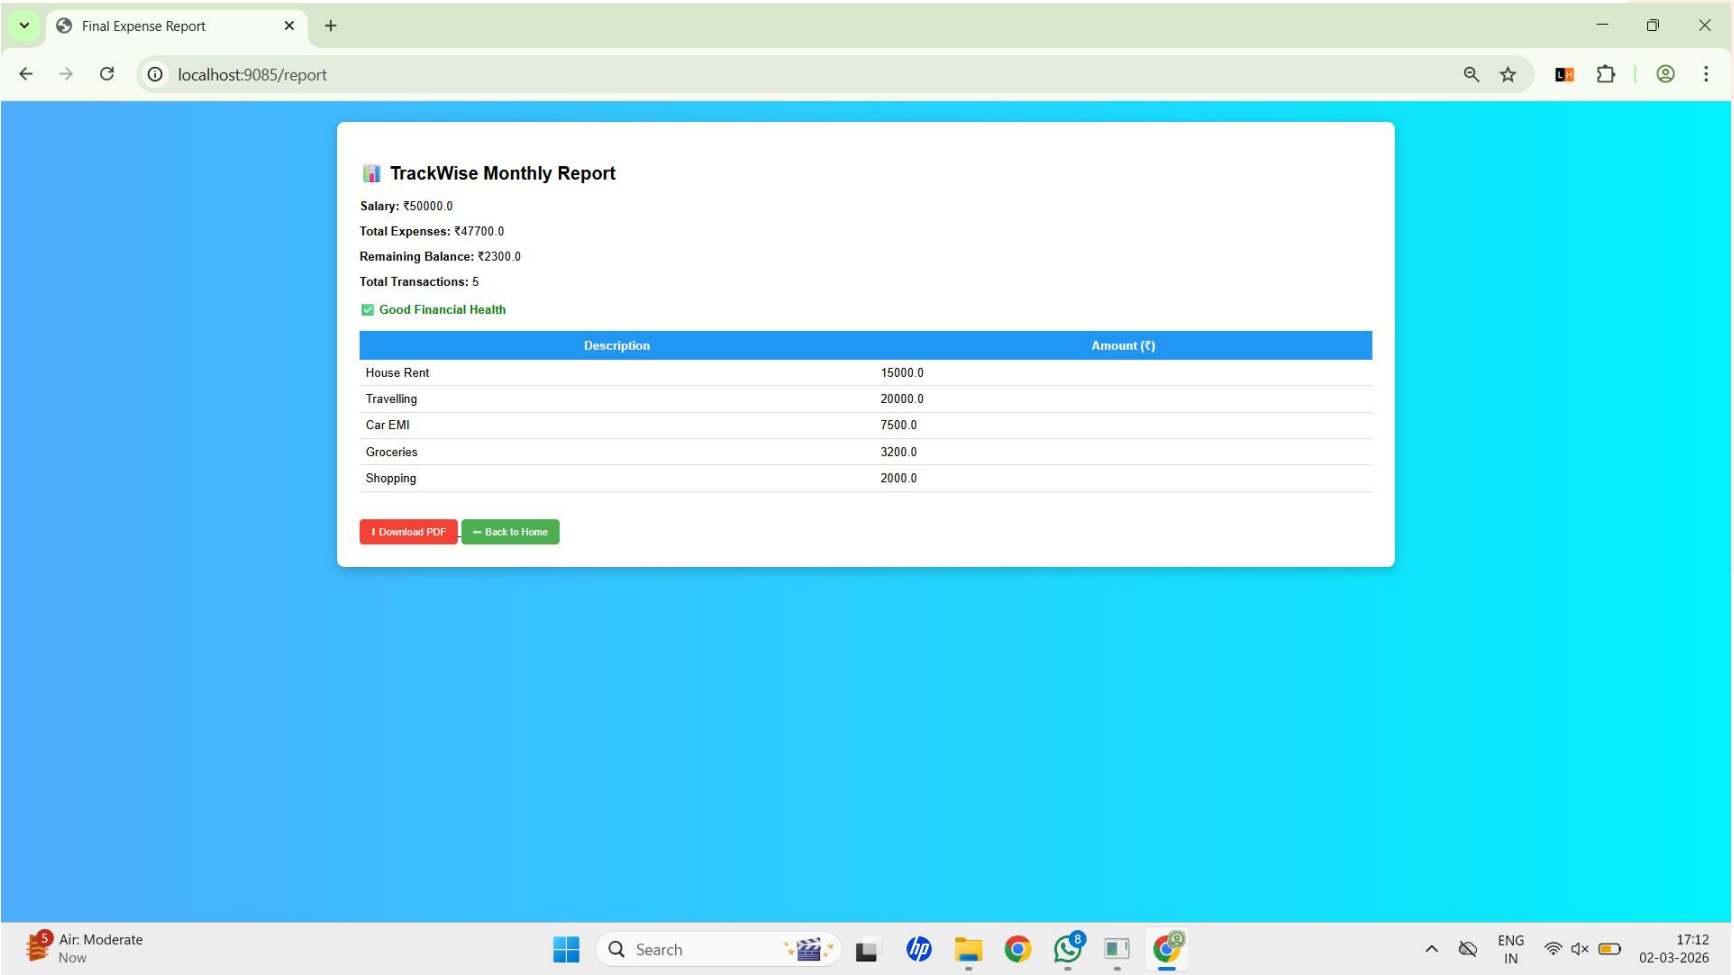

7

8(C)

9

Expense Exceeded Warning: Alert Message displayed when total expenses exceed the defined salary limit.

Final Report Page: Monthly Expense Report summarizing total transactions and financial health status.

ADVANTAGES & LIMITATIONS

1

❑ Advantages:

- Secure login system
- Real-time expense calculation
- Relational database storage
- CRUD operations implemented
- Financial health indicator
- PDF report generation
- Clean UI design

2

3

4

5

6

7

❑ Limitations:

- Single user system
- No multi-user roles
- No cloud deployment
- No advanced analytics
- No mobile app version

8

9

Thank you
